## Triumph Makes Holidays Bright for Hunts Point Children

**Hunts Point, Bronx, NY** (December 19, 2024) – Triumph Construction Corp., one of the largest privately-held utility contractors in the New York metropolitan area, has once again brightened the holidays for the entire student population of three- to five-year-olds at La Peninsula Head Start (La Pen) in Hunts Point, New York.

“For at least 15 years, Triumph Construction has been honored to buy toys for these children,” says Triumph Construction Founder and President Carlo Cuzzi. “The happiness on their faces when they unwrap their gifts is a highlight of our year. Making sure these boys and girls receive the presents they want from Santa is our way of giving back to the community and our neighbors.”

According to Cuzzi, whose construction company is headquartered nearby on Seneca Avenue in Hunts Point, the students at La Peninsula Head Start each write a letter to Santa and Triumph Construction tries to get the children everything on their lists. Despite the busy holiday shopping season, Triumph employees volunteer their time buying and wrapping the gifts. “It’s a labor of love and an honor,” Cuzzi explains. “I know we’ll be doing it for many years to come.”

La Peninsula Head Start has served more than 1,000 preschool children since its founding in 1965, providing Head Start services with a focus on meeting the individualized needs of the community’s most vulnerable families. The program serves children from 3 to 5 years old and their families. More information is available at [Lapen.com](http://Lapen.com).

Triumph Construction Corp. is active in New York City and the surrounding region. A sought-after partner in everything from gas and electric service work to major capital improvement projects, the company is also active in large-scale private sector construction jobs.
